NIKHAR JAJOO

AI PRODUCT MANAGER

+91 8320170508 | nikharjajoo@gmail.com | linkedin.com/in/nikhar-jajoo | nikharjajoo-tech.github.io

PROFESSIONAL SUMMARY

AI Product Manager with **7+ years of experience** including deployment of enterprise-grade Gen AI solutions for financial services and consulting clients. Proven track record leading cross-functional teams to implement **Retrieval-Augmented Generation (RAG) knowledge AI, Report Builder, and VDR AI** platforms built on **large language models (LLMs)**. Expertise in bridging technical AI implementation with clear business outcomes, product discovery, stakeholder alignment, and Agile ceremonies. Seeking to leverage deep experience in AI **workflow automation**, requirement translation, and **go-to-market** adoption for high-impact **AI Product Manager** roles at innovative startups and enterprise SaaS firms.

WORK EXPERIENCE

Attri AI | *Technical Project Manager* — Ahmedabad, IN | July 2026 – Sep 2026

- Onboarded as Technical Project Manager to lead delivery for a newly scoped enterprise AI transformation engagement; when the client engagement did not materialize shortly after kickoff, proactively redirected focus to internal product development.
- Prototyped a GenAI claims-denial triage agent that parses the denial, retrieves the insurer's governing policy clause, and validates it against the medical record line by line, cutting a **45–60 minute** manual appeal review to ~**60 seconds** and returning an explicit appeal-or-write-off call.

Grey Chain AI | *AI Product Manager* — Gurugram, IN | June 2025 – June 2026

- Owned AI product requirements and backlog for a **15-person** cross-functional team (AI engineers, QA, BA, DevOps, UI/UX); translated **PRDs** into **200+ user stories in Jira** across 11 two-week sprints to deliver the enterprise GenAI CPD report builder platform.
- Spearheaded delivery of an enterprise GenAI CPD report builder platform, owning the full lifecycle from product discovery and requirements through Agile execution to production launch; compressed first-draft turnaround from **2–4 months** to 3–5 days (client-validated ~**95% reduction**).
- Diagnosed ingestion scalability bottleneck at 100 MB / 1,000-page threshold through structured load testing; implemented an async batch-processing data pipeline, scaling support to **300 MB+ files**.
- Co-owned product strategy and roadmap for a GenAI due diligence platform for a major environmental consulting firm, leading a 6-person cross-functional team from requirements through **UAT** in 3 months; achieved **80–85% classification accuracy** across 1,000+ unstructured documents per engagement.
- Defined AI product requirements and acceptance criteria for the document intelligence platform that automated categorisation of 1,000+ documents per engagement, reducing manual document review time by ~**95%** (1–2 weeks to 3–4 hours).
- Led end-to-end delivery of a GenAI platform for a major Dubai-based banking institution in 5 months, directing an **8-member** cross-functional team (Backend, Frontend, QA, BA, DevOps) across various business units.
- Owned product strategy, product roadmap, and feature prioritisation for a **RAG** platform built on **OpenAI** and **Pinecone vector DB**, using embeddings-based hybrid search across ~1,000 enterprise documents in 8 formats; cut answer retrieval time ~**87%** (5–7 min to 30–40 sec).
- Identified retrieval risk mid-project and proposed CBAC as a governance layer on top of RBAC; secured formal banking leadership adoption, eliminating cross-regional misinformation risk across ~1,000 users.
- Drove **go-to-market** and user adoption post-launch, scaling **10x (20 to 200 users)** in 30 days via product demos, training, and a 30+ template Prompt Library; tracked engagement in a **product analytics** dashboard, with daily queries per active user up **85% (12 to 22)**.

Deloitte USI | *Consultant / Project Lead* — Gurugram, IN | June 2019 – Mar 2025

- Delivered an automated contract migration solution across **7,000+ legacy contracts**, eliminating **2,500+ person-hours** of manual effort and achieving **100% compliance**.
- Led process transformation by designing an automation solution using Gen AI and Advanced Excel, achieving **99% compliance** and **80% reduction** in supplier onboarding time.

- Spearheaded robust reporting systems using Prompt Engineering & Excel (VBA, Power Query) to track requisition costs & KPIs, saving **30+ hrs/month** for senior leadership.
- Owned end-to-end delivery of SAP Ariba GB, accelerating requisition approvals by **30%** and enhancing operational efficiency organisation-wide.

PROJECTS

ClaimMate: Voice AI Claims Agent | *Independent Project* GitHub | Live App

- **Validated** that voice AI can safely automate insurance claim intake, meeting **all 4 launch criteria set up front** across 50 test claims: flagged **100% of injury and danger cases with zero false alarms**, routed **96%** correctly and recorded **zero hallucinated facts**, by building and deploying a live POC that turns a claimant's spoken call into a structured, policy-verified claim for adjusters.

AI Support Ticket Copilot | *Independent Project* GitHub | Live App

- Built an LLM triage copilot (Python, Streamlit, Gemini) that classifies B2B SaaS support tickets, assigns priority from business policy, and drafts grounded replies with coded escalation to humans, reaching **100% urgent-ticket recall and priority accuracy** at **1.8s median latency** and **~$1.19 per 1,000 tickets**, validated through an **LLM evaluation** harness built on a hand-labelled golden set and a blind grader with targets set before testing, iterating the priority policy across 3 models.

SKILLS

Product Management:	Product Discovery | User Stories & Acceptance Criteria | Product Roadmap & Feature Prioritization | AI Feature Specification | Go-to-Market & Adoption | Stakeholder Alignment | UI/UX
Gen AI:	Large Language Models (LLMs) | Retrieval-Augmented Generation (RAG) | OpenAI GPT | Claude | Gemini Live | LangGraph | Vector Databases | Prompt Engineering | LLM Evaluation & Benchmarking | Hallucination Detection & Guardrails | AI Agents
Project Delivery:	Agile/Scrum | Sprint Planning & Execution | Backlog Management | Jira & Confluence | Release Management | Cross-Functional Team Management | Risk Management
Technical & Data:	SQL | Power BI | Advanced Excel (VBA, Power Query)

CERTIFICATIONS

- **Applied AI for Product Managers:** 100x Engineers (In Progress) | 2026
- **Generative AI Certification:** Nvidia | 2025
- **Prompt Engineering:** DeepLearning.AI | 2025
- **Advanced Excel:** Tutedude | 2023

ACHIEVEMENTS

Deloitte USI

- Awarded annually (2020–2024) for accuracy, efficiency, and consistency in project execution by senior leadership.

Formula Student (FSAE) | Leadership | Product Management

- **Cross-Functional Leadership:** Directed a **33-member team** across departments to deliver a competition-ready prototype, aligning engineering and business goals under tight deadlines.
- **Data-Driven Product Optimization:** Analyzed chassis performance data using regression models, reducing weight by **26% (38 kg to 28 kg)** to enhance vehicle efficiency, aligning with cost and performance metrics.

EDUCATION

MBA | Operations & Marketing | CGPA: 8.11/10 2017–2019
Bennett University (TIMES Group)

B.Tech | Mechanical Engineering | CGPA: 8.26/10 2012–2016
Vellore Institute of Technology
